

FPV Racing & Inspection Drone

High-Agility UAV for Industrial Inspection & Competitive FPV

OVERVIEW

The HFPV-04 is a high-performance FPV platform engineered for exceptional speed, agility, and close-quarters inspection missions. Equally adept at navigating confined industrial environments as it is on the racing circuit — with ultra-low video latency and a modular camera architecture for every operational requirement.

TECHNICAL SPECIFICATIONS

Top Speed	120 – 180 km/h
Flight Time	10 – 20 minutes
FPV Camera	HD FPV + Optional Thermal / RGB
Video Latency	< 20 ms (digital FPV system)
Transmission Range	Up to 5 km (clear line of sight)
Frame Size	3" – 5" (mission configurable)
Thrust-to-Weight	> 4:1
Motors	High-KV Brushless, Racing-Grade
ESC	4-in-1 BLHeli32 / AM32
Controller Protocol	ExpressLRS (ELRS) Ready

KEY FEATURES

- ▶ Ultra-low video latency (<20 ms) for precise real-time situational awareness
- ▶ Compact and highly maneuverable for confined-space and indoor inspection
- ▶ Modular camera mount: visible light, thermal, or inspection probe
- ▶ Crash-resistant frame with tool-free quick-swap arms
- ▶ GPS rescue and return-to-home failsafe for operational safety

USE CASES

- ▶ Industrial Pipeline Inspection
- ▶ Bridge & Tower Structural Inspection
- ▶ Indoor Facility & Asset Inspection
- ▶ Search & Rescue Operations
- ▶ FPV Racing & Pilot Training
- ▶ Film & Action Cinematography
